Srinath Kishore A

Systems Development Engineer | GenAI & Backend Systems
srinathkishore.a@gmail.com | linkedin.com/in/srinathkishore | srinathkishore.github.io

Summary

Systems Development Engineer at **Amazon** with experience building GenAI applications and backend systems using Python, Django, PostgreSQL, and AWS. Specialized in LLM-powered enterprise applications, retrieval-augmented generation (RAG), multi-agent orchestration, concurrent APIs, and enterprise integrations. Experienced in authentication, observability, production deployments, and backend reliability.

Experience

Systems Development Engineer I – Amazon *Sep 2026 – Present*
Chennai, India

- Develop and improve **internal engineering tools** to streamline team workflows and improve developer productivity.
- Build features and automation that reduce manual effort and simplify repetitive engineering tasks.
- Improve the **reliability, performance, and usability** of internal tools through iterative enhancements and user feedback.
- Contribute to code reviews, design discussions, and **CI/CD workflows** to deliver maintainable, well-tested changes.

Software Engineer – GenAI Backend Systems *Jun 2024 – Sep 2026*
Greeno Tech Solutions Pvt Ltd, Coimbatore, India

- Built an **LLM-powered enterprise multi-agent platform** comprising Buyer, Requester, Inventory, and HR agents using Python, Django, PostgreSQL, and AWS, with RAG, tool calling, and server-sent events (SSE) streaming.
- Engineered a **concurrent, multi-session backend** with persistent conversational context, agent orchestration, and retrieval pipelines integrating enterprise systems through OAuth-secured APIs.
- Designed a **canonical response architecture** to standardize agent outputs across a web chat interface, Microsoft Teams, and extensible communication channels.
- Implemented authentication, **role-based access control (RBAC)** and deployment hardening; supported deployment, monitoring, debugging, and performance optimization.
- Developed logging, observability, and anomaly-detection pipelines to analyze request patterns and latency, helping accelerate troubleshooting and improve system resilience.

Technical Skills

Languages	Python, JavaScript
Generative AI	LLMs, Retrieval-Augmented Generation (RAG), Tool Calling, Agentic Workflows
Machine Learning	LoRA, Quantization, Inference Optimization
Backend Engineering	Django, REST APIs, System Design, Concurrency, Distributed Systems
Cloud and Operations	AWS (EC2, IAM, S3, VPC), Monitoring, Observability, Secure Deployments, CI/CD
Database	PostgreSQL

Education

B.E. in Computer Science *2020 – 2024*
Hindusthan College of Engineering and Technology, Coimbatore, India **CGPA: 8.67/10**
